Programming languages:
- Advanced: HTML, CSS
- Intermediate: Sass, Javascript (React, Vue), Version control(Git)
- Familiar: Node.js, Laravel, MySQL

Personal Projects

Share Playlist | Vue3.js, Firebase | https://vue-shareplaylist.firebaseapp.com
- Share Playlist is a simple web application where user can sign up, create a playlist of song(s), and share the playlist to other users
- The user first sign up, then will be redirected to their own homepage. There they can make a new playlist, upload playlist cover image, and finally add songs to that playlist.
- It is built using vue.js framework as the front-end and firebase services as back-end.

Live Chatroom | Vue3.js, Firebase | https://vue-project-ed417.firebaseapp.com
- Live Chatroom is a messaging app built using Vue 3 as the front-end and Firebase as the backend.
- Users can sign-up for the first time by providing display name, email, and password. After signing up, users would get into the chatroom where they can send messages real time.

Article Preview Component | HTML, CSS, Sass, Javascript | https://ckrdi.github.io/article-preview-component/
- This is a solution to the Article preview component challenge on Frontend Mentor. Frontend Mentor challenges help you improve your coding skills by building realistic projects.
